

Senzu and Phygital are two companies that join forces to offer a brand new way to communicate with your customers and increase your visibility.

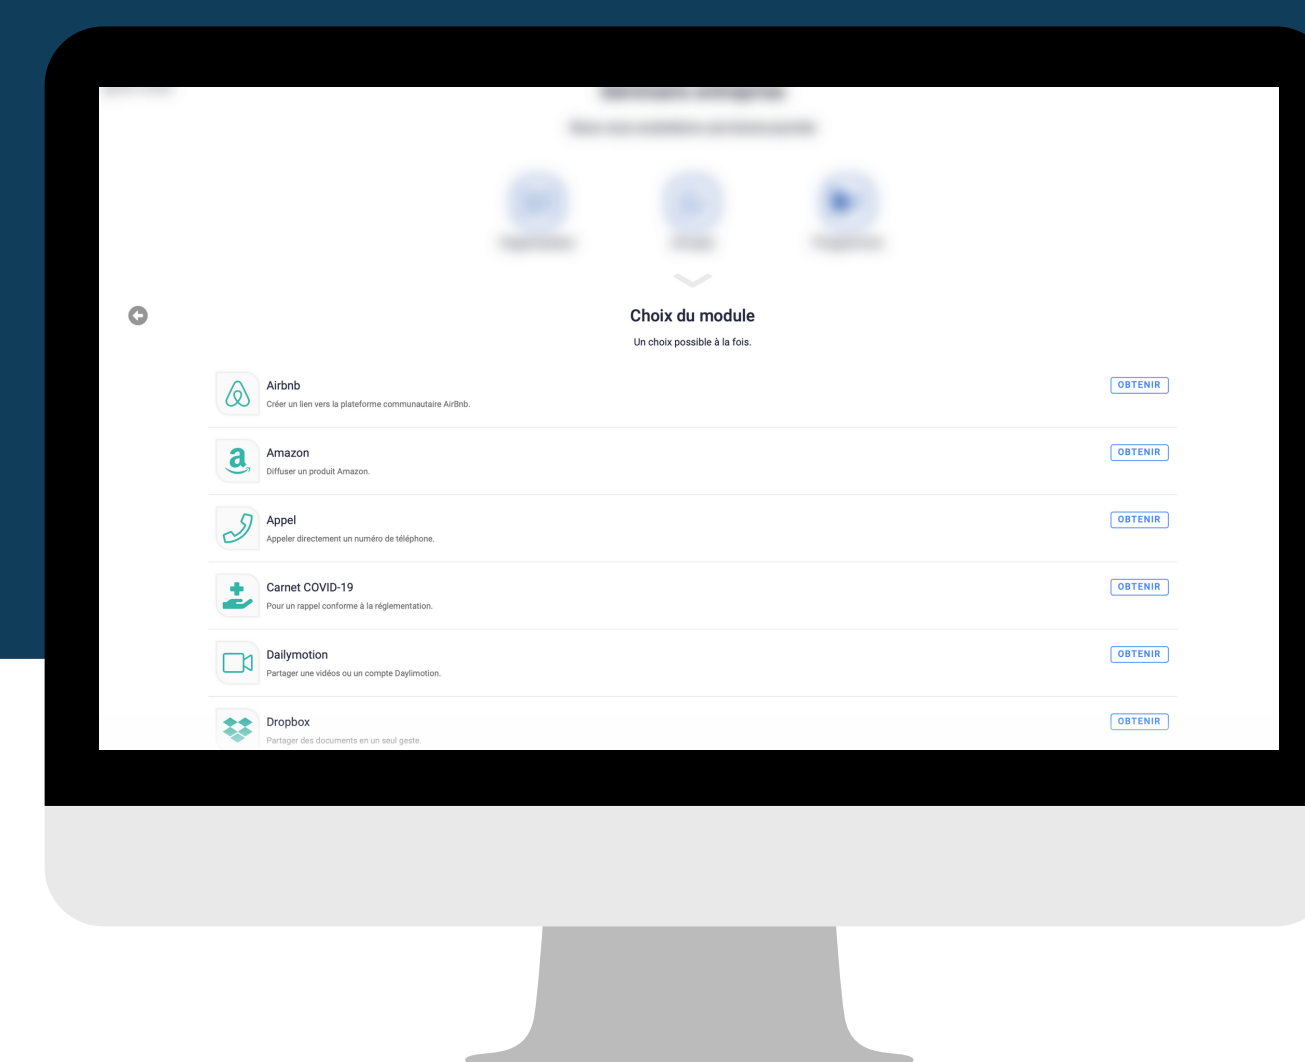

# Senzu

The operating system that adapts to your objects.

## SENZU FOR MAKERS

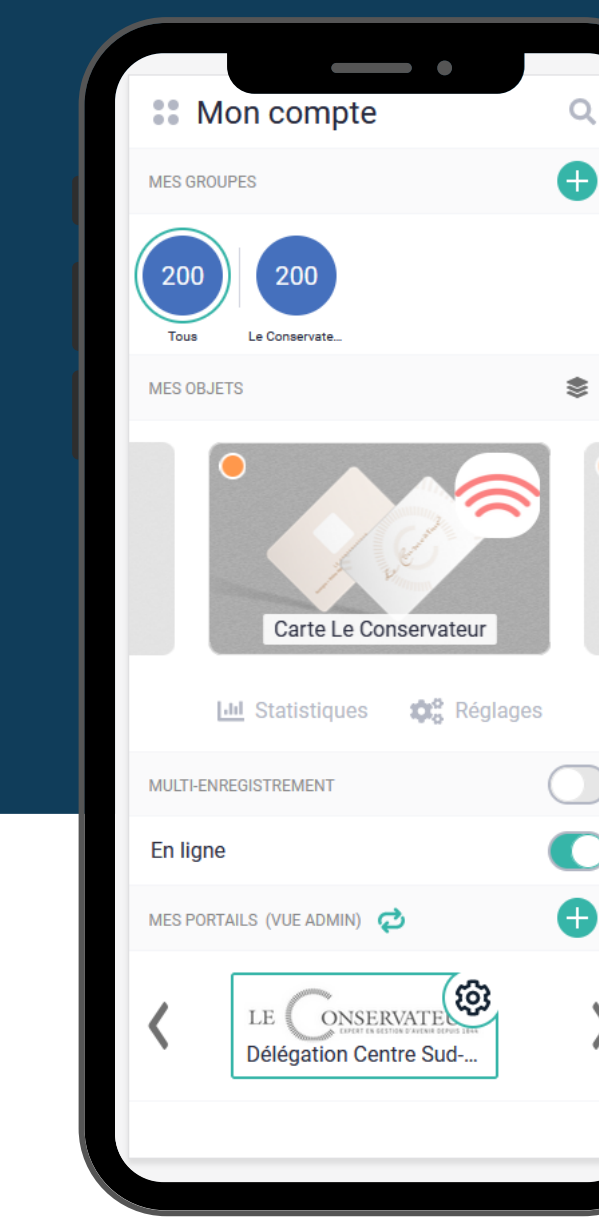

Using NFC and QR code technologies, Senzu aims to connect any kind of objects that you could use in everyday life, such as pens, bracelets, rings, notebooks, and much more...

## SENZU FOR DEVELOPERS

Each developer can propose his features on our Senzu module store.

They can be proposed for free or for a fee like on the AppStore.

## SENZU.APP

A management interface is available for the user. He will be able to configure very easily all the information he wants to share with his customers, without having to download any application, and in a totally unlimited way in time.

# Phygitags

Phygitags offers business cards and domes connected to the Senzu ecosystem.

## CARDS

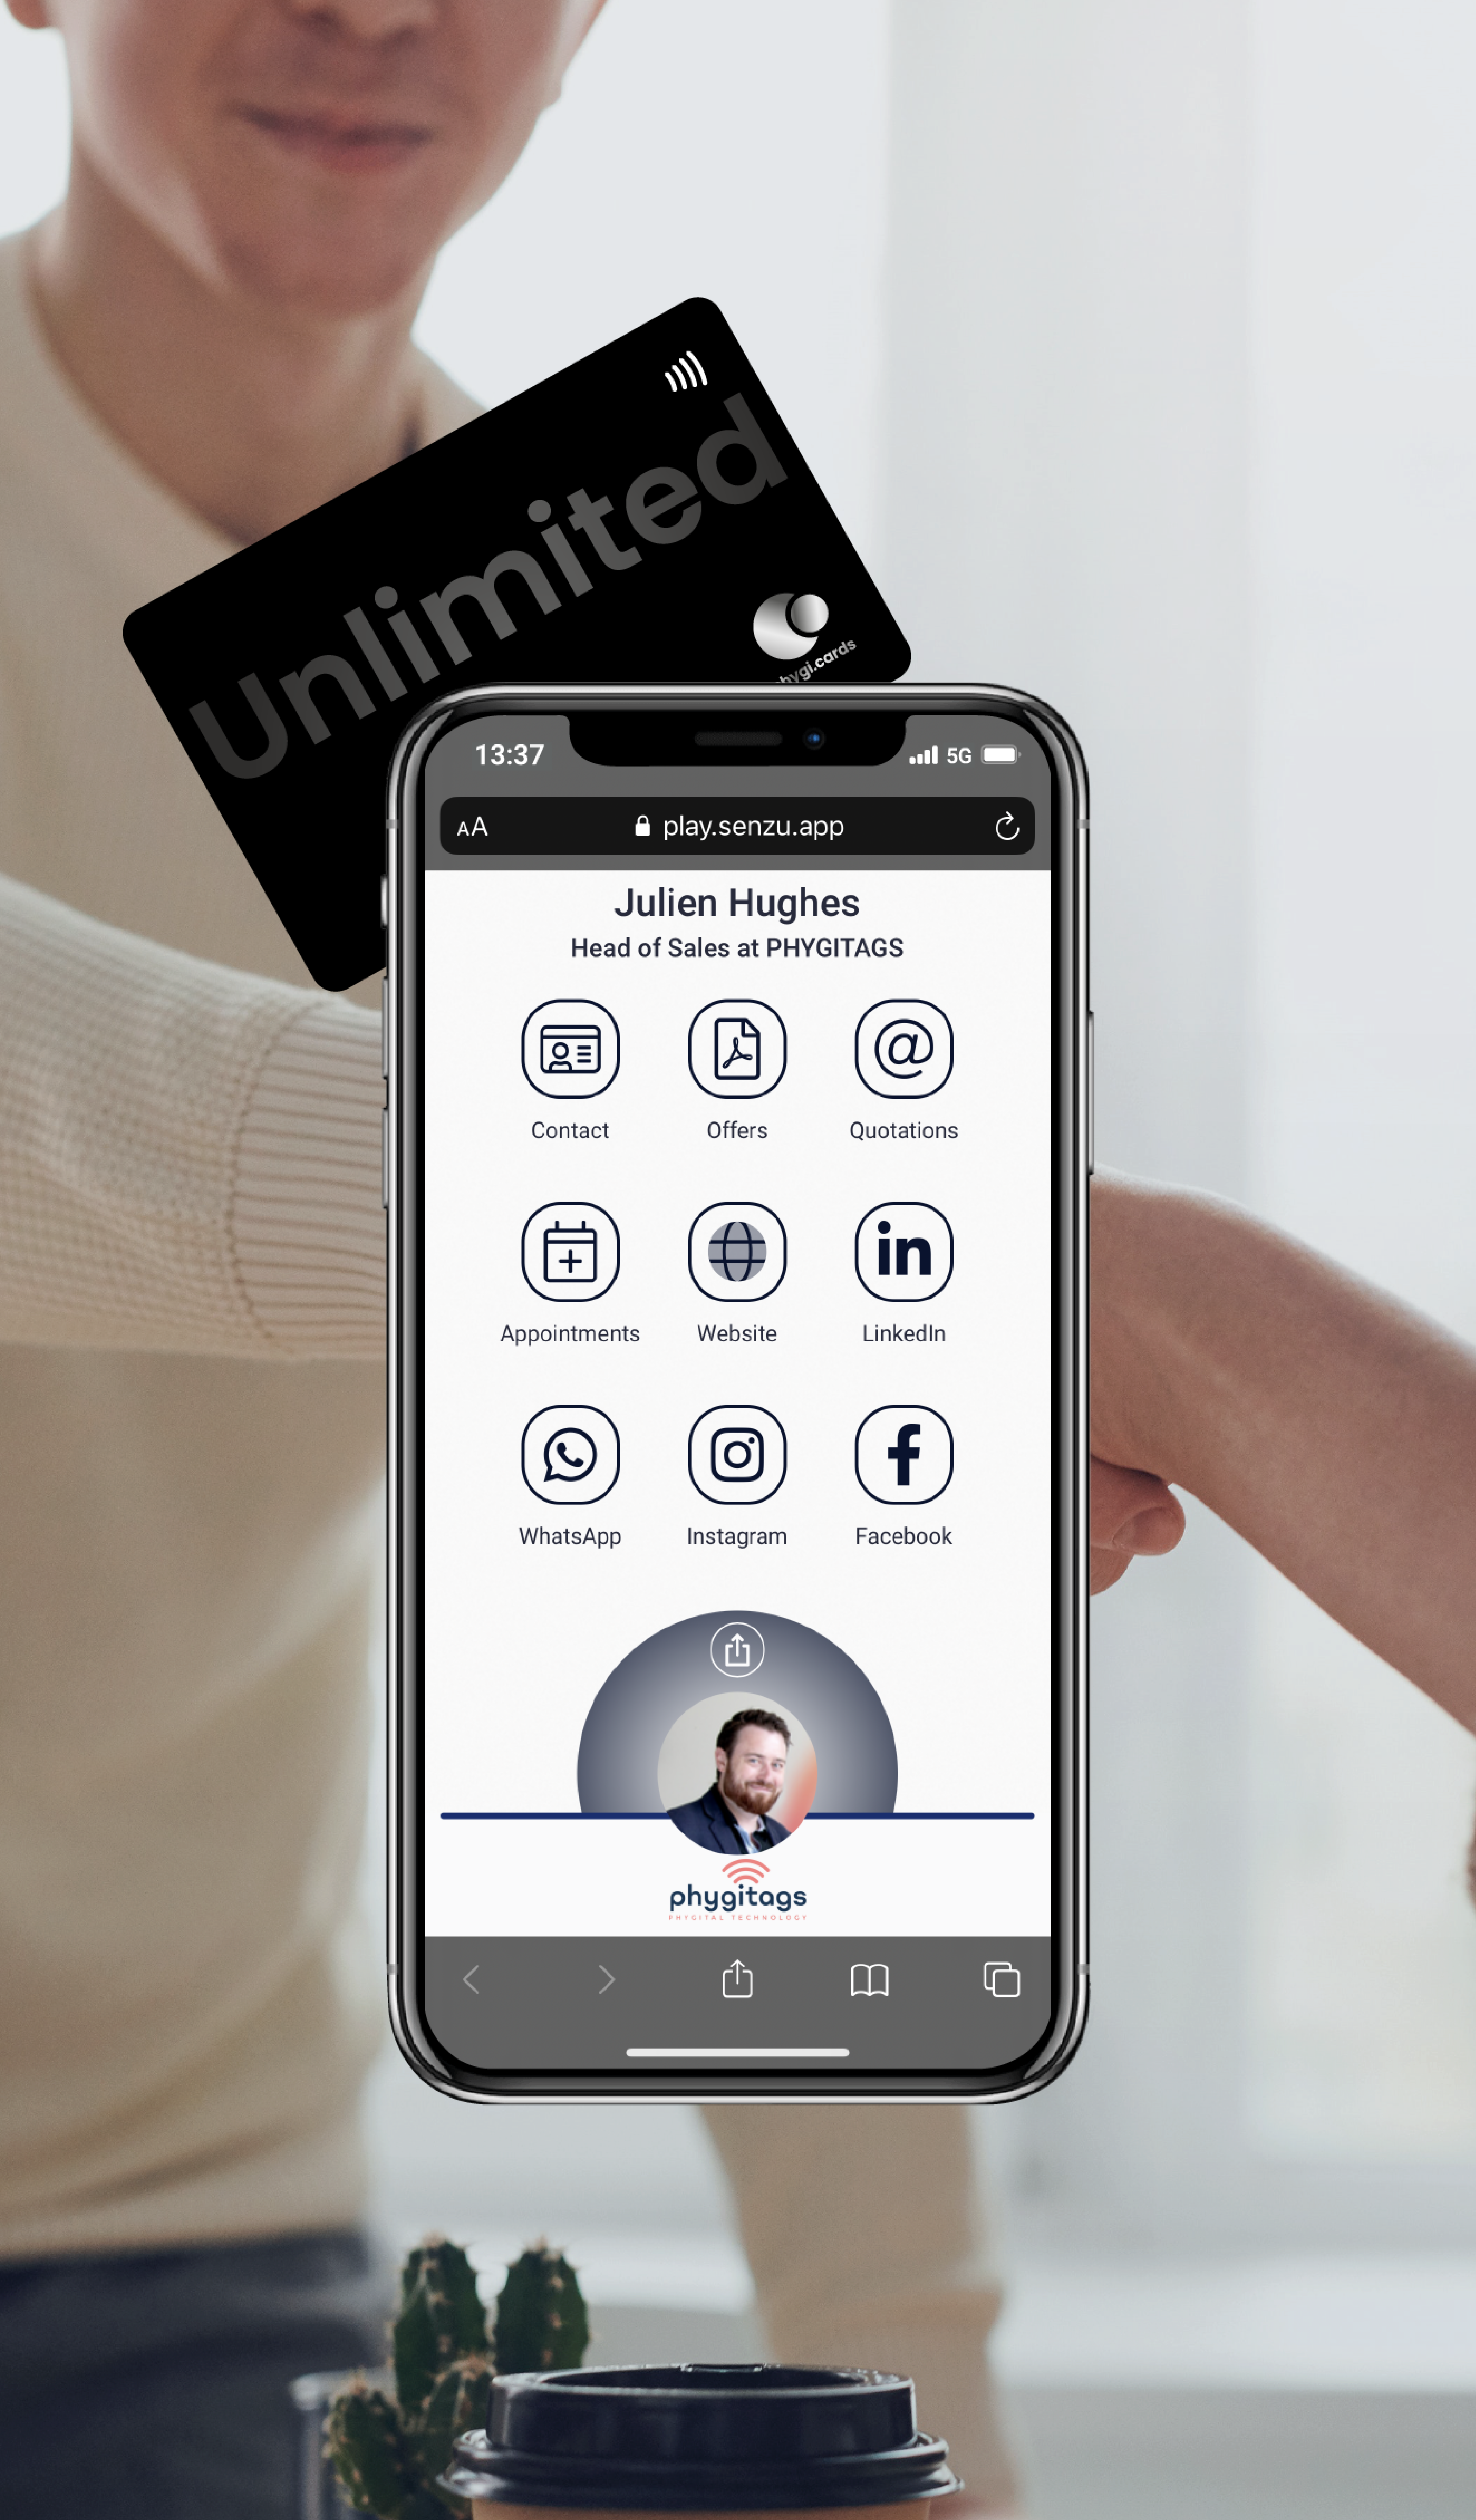

By approaching the phone or scanning the QR code on the card, your customers will have access to all the information you decide to share with them. A connected business card with direct access to your contact information, your LinkedIn page, any document related to your company, your quotes and much more.

## DOMES

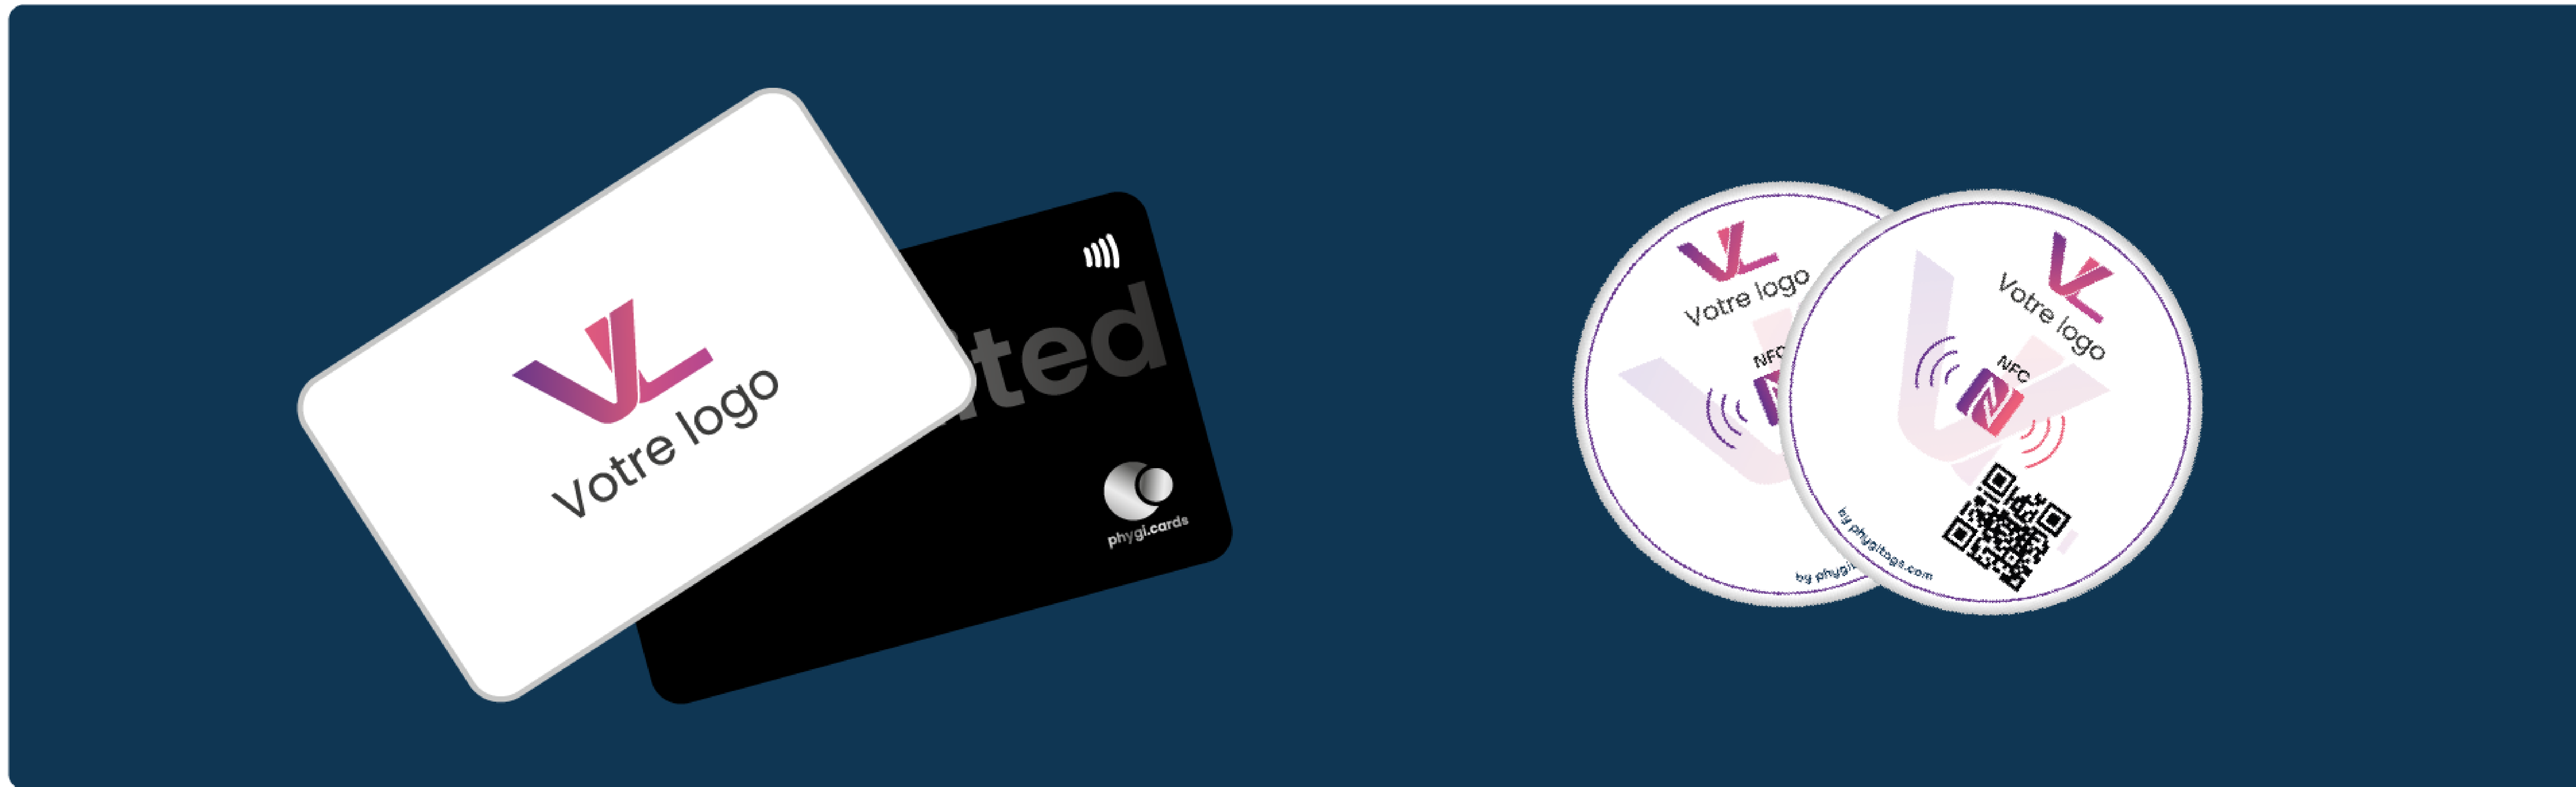

The domes will allow specific businesses such as restaurants, bars, and hotels to share with their customers their Facebook and Instagram pages, the menu, information about room service, and offer direct access to Apps such as Trip Advisor, hotels.com, and Google review...

# Commercial

Boost your business and increase your sales.

By approaching your connected card to your customers' smartphone, or by letting them scan the QRCode, they will have access to all the information related to your business activity on a personalized, intuitive and scalable interface.

Contact

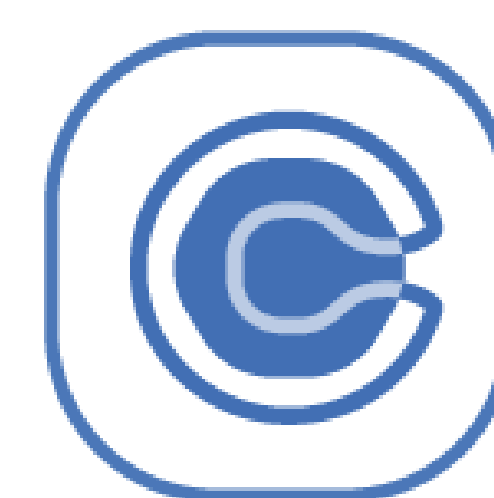

WhatsApp

Always stay in touch with your customers.

Calendar
