

## SMART SPACES SOLUTIONS

The most powerful IoT solution  
for remote management of all spaces

Home

Build to Rent

Building

Offices

Vacation Rentals

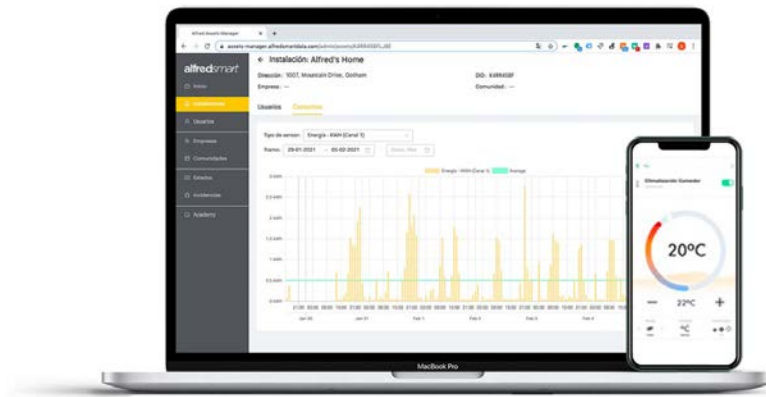

Hotels

## Make it Simple & Smart

- ^ Compatible with more than 1.500 devices
- ^ No need for building work
- ^ Plug&Play, professional and simple installation
- ^ Technical support service

## Control everything from one single platform

## All Smart devices your space may need, working brilliantly together

### Gateway

Integrates, controls and communicates all Smart devices, taking the appropriate actions to improve sustainability, comfort and safety of all spaces

### Digital Access

Open and close doors and send temporary keys through WhatsApp with our keyless Smart locks. Get a complete entry and exit log on the App

### Power Consumption monitoring

Know in real time, manage the temperature remotely from the Alfred App/platform and save on the energy consumption of your spaces, gaining in sustainability

### Lighting control

Turn off, turn on and regulate lights of any space to your liking from the Alfred Smart App for a greater energy efficiency and well-being

### Blinds control

Make your existing blinds Smart with a simple device. Let your blinds go up or down, reduce your energy expenditure and decide how bright your space is just with your phone

### Flood detecting device

Smart sensor to control any water leakage, avoiding flood damage at your spaces. Immediate real-time notification to your Smartphone
