

**SECRET communication as a service**  
Enabling exchange of classified information

**SECTRA**

## Sectra Tiger/S—the core of the service

With 40 years of experience of protecting information and securing communication on the highest level, Sectra can offer you a tested and approved solution as a service. Sectra Tiger/S is an easy-to-use secure communication solution for stationary or mobile use. It allows you to share classified information up to the classification level SECRET through encrypted voice communication, messaging and data transfer.

The solution has been designed to guarantee availability and offers the flexibility to connect through all types of IP networks, such as satellite, fixed and mobile networks. Sectra Tiger/S also supports over-the-air re-keying as well as over-the-air phonebook distribution. SECRET communication as a service is delivered as a turned key solution with all equipment needed.

## Designed to protect your national secrets

Information is one of the most valuable assets that your organization has—which means that it needs to stay protected at all times. Exchanging classified information should be as quick and easy as sharing any other information. It should enable your organization to focus on your everyday business.

This is why Sectra has designed this service for users handling information up to and including the classification level SECRET—so you can be sure that your secrets stay *your* secrets.

## Protecting Dutch state secrets since 2007

Dutch ministries and government officials have used Sectra's secure communications solutions for sharing and communicating classified information since 2007. Secure communication as a service, referred to by the Dutch ministries as VECOM, is used for both national and international communication and covers a range of solutions. This enables the Dutch ministries to offer employees the most appropriate security solution based on their individual communication and security requirements.

“ We handle classified information on a daily basis, and need evaluated and trusted products to protect our communication. The possibility of having secure communication as a service with a partner specialized in cybersecurity is extremely valuable. ”

*Central Contract Manager VECOM2*

## Why as a service?

SECRET communication as a service is offered as a fixed TCO (total cost of ownership) for at least five years. There is no initial investment, and your main contact at Sectra will make sure that the hardware is always updated and configured with the latest version as well as upgraded when needed. The infrastructure will be updated every five years, or before if the software update requires it. Tiger/S units will be exchanged every three years, and there will always be spare equipment at the customer's site in case of unexpected scenarios.

Finally, solutions can be tailored to the customer's needs and requirements. With SECRET communication as a service, you can focus on your core business—while we protect your information and communication.

### The service includes:

- Infrastructure for the Tiger/S system (Communications manager, Key generation center and Security management center)
- Agreed number of Tiger/S phones
- Service and maintenance program – Hardware and software updates
- One main contact at Sectra for delivery and support
- Spare equipment on site at the customer's organization
- Ability to add different services tailored to the customer's needs

## Additional services tailored to your needs

Since all organizations have different needs when it comes to cybersecurity solutions, we can tailor SECRET communication as a service to your specific requirements. Some examples of additional services:

### Secure mobile workplace up to SECRET

With Sectra's Secure mobile workplace, individuals can handle classified information up to and including the classification level SECRET while working from home or elsewhere.

#### The package consists of:

- Sectra Tiger/S phone: for secure voice communication and messaging
