Benefits of Unification

Benefits Savings & Efficiency

Digital Services Platform (DSP)

New Digital Services Paradigm

Digital Content, Applications and Services

Over-the-Top Delivery of Digital Services

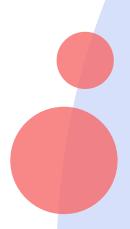

OTT Delivery Creates Digital Service Islands

Merchant owns digital service island(s)

- Privileged access to subscriber
- Complete control over customer journey
- Direct control over monetization
- ► Full insight to increase engagement

CSP provides the data network for digital delivery

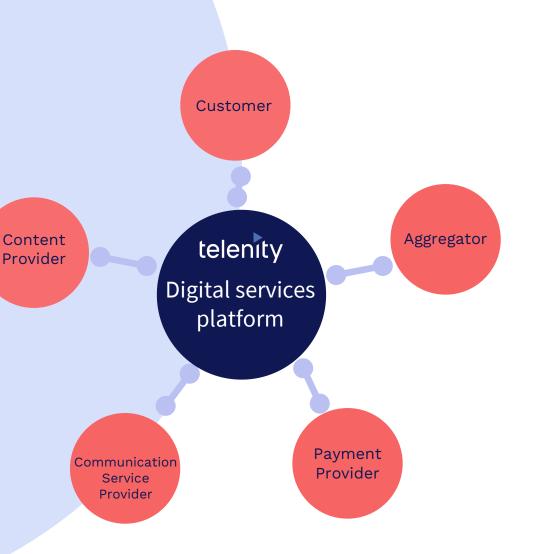

- Diminished participation in the growing digital economy
- Inability to bundle in-network services and digital services
- Limited control over customer journey
- Restricted customer insight across merchant islands

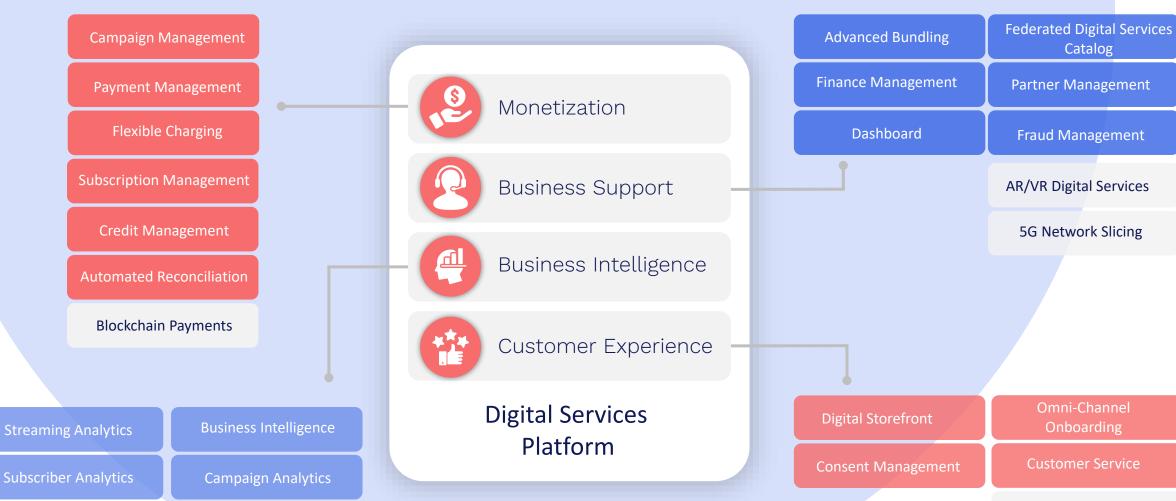

Telenity Digital Services Platform CSP Benefits

- Leverage strengths in subscriber big data and trusted billing to regain control in the new digital services paradigm
- Manage the digital services ecosystem through a unified digital BSS platform
- Advance customer engagement to monetize growing opportunities enabled by the digital economy
- Transform customer experience and increase customer loyalty
- Use business intelligence to maximize customer lifetime value
