Products that protect the places we work, learn, play and travel

# SURFACES CAN LOOK CLEAN, BUT CLEAN DOES NOT MEAN GERM FREE

## PROTECT HIGH TOUCH SURFACES FROM BIOLOGICAL HAZARDS

High-touch surfaces are at risk for contamination. Every time we touch a surface, we leave behind a biological footprint that the next touch can pick up. Coughs and sneezes further deposit microbes that contaminate surfaces. This is what drives our non-stop cleaning and disinfecting.

**Protect 90, powered by the Aegis Microbe Shield, provides 24/7 90-day prevention of microbial growth for high touch surfaces. It is a complement to your current cleaning protocols.**

The first product registered to help achieve disinfection objectives as a complement to current protocols

### PROVEN

Proven to reduce microbial contamination by greater than 90% through lab testing and on-site ATP testing. Lasts for 90 days

### EASY

Protect 90 Program contains everything you need to protect 1000 sq ft of high touch surfaces. Simple instructions. Apply once every 90 days

- Durable protection
- Safe
- Easily
- Cost effectively
- Proven Effective

**ENDURING SURFACE  
PROTECTION FOR 90  
DAYS MEANS NO NEED  
TO CONTINUOUSLY  
DISINFECT!**
