

Smart Farming Platform

The most complete & efficient solution for farming and agriculture

Smart Farming Platform is an enterprise-standard farm management application that helps farm owners easily manage work, manage personnel without spending too much time, manpower and costs. SFP helps farm owners or managers to set up standard farming and breeding processes for each crop, from which they can decentralize and manage each work item in detail for their employees' day and easily adjust when/where there is a change in personnel without affecting the production chain.

Besides, the employees can actively monitor and properly perform the assigned work, as well as report the work situation easily. With simple operations, managing one or more farms is easier than ever.

Some of the features:

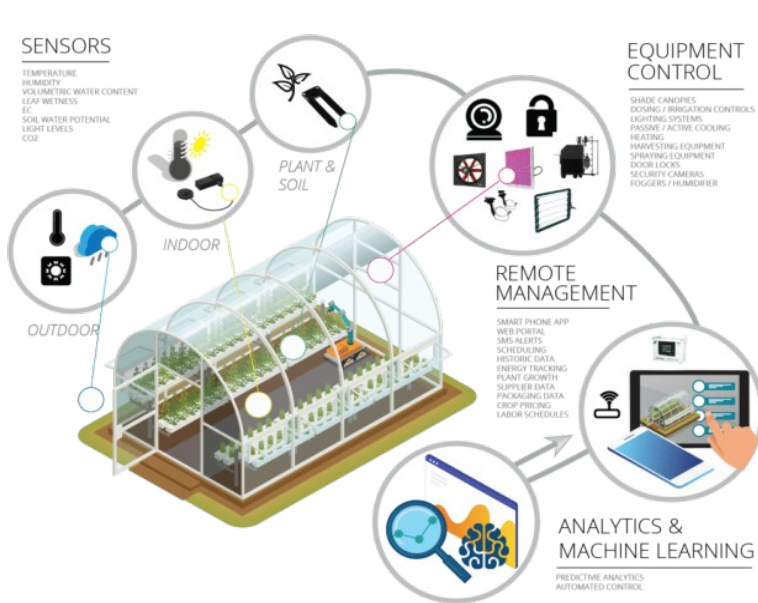

- IoT Platform
- Cultivation of farming process
- Work management, Job assignment
- Production management (planning, progress reports, farming logs)
- Products & Materials Inventory
- CRM, Contract, Invoice, Payment, Delivery management
- Safety and Quality Control (QR)
- Full ERP: Financial, HR ...

End-to-End Platform and Application for different use cases

Example:

CLIMATE CONTROL SOLUTION FOR VERTICAL FARM (For leafy green, herbal, medical use cannabis..)

Sense hydroponic controller pro

Dosing pump with 2-5channels

Sense Hub gateway

Sensors:

Air controller

CO2 controller

Humidity controller

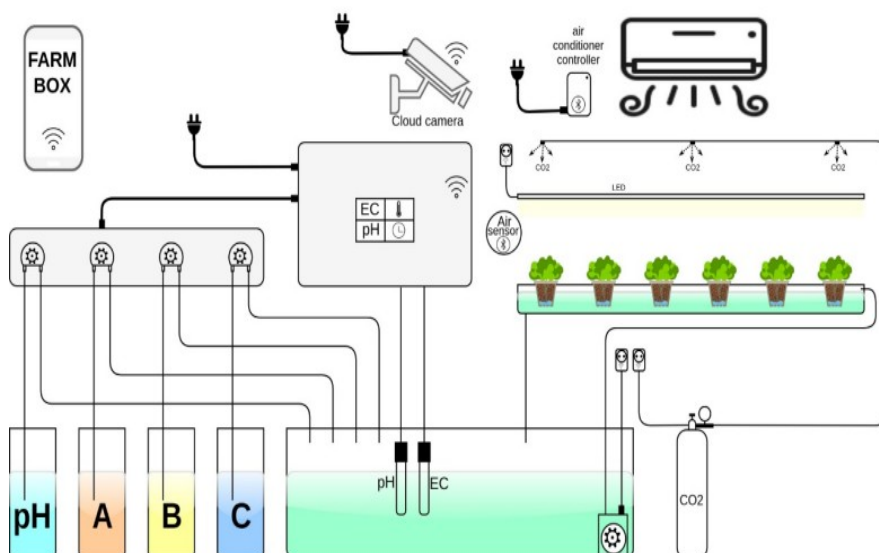

2-Channel Switch

Cloud IP Camera

Installation:

A true Multi-Os
and
Multi-Devices
Solution

About us:

BMIZE is the leader in empowering enterprises to go **efficient**
We offer a high level of reliability and performance in delivering mobile solutions, products and services
By adopting our solutions, companies can truly enter the age of mobility in order to boost their productivity and at the same time reduce their costs!
