Foreword from Minister for Exports Mike Freer MP

The UK is proud to be Europe's leading tech nation with a start-up and scale-up segment valued at over \$585bn. The UK's strong research base, talent pool, dynamic ecosystem, reputation for innovation and attractive business environment continues to foster the best environment for the creation and development of world leading and innovative tech companies.

The UK remains Europe's number one destination for Venture Capital and – despite the pandemic – received the record amount of \$15bn in 2020, equating to one-third of the European-wide total.

This clearly demonstrates our resilience and dynamism as one of only three countries that has seen investment growth each year since 2015. The UK is the first country in Europe and the third globally to have reached the milestone of 100 tech unicorns, with 29 unicorns being created in 2021 alone. The number of UK tech unicorns now stands at 116, which is more than Germany, France and Sweden combined.

Ranking 4th in the Global Innovation Index 2021, we are home to the world's first dedicated 6G innovation centre and our record levels of R&D investment continues to drive UK tech innovation forward, with a total UK corporate spend of \$26bn in 2019.

I am delighted to be attending MWC with an outstanding and diverse UK tech delegation. This directory provides a list of the UK companies exhibiting at the show and I invite you to come and meet them at the UK Pavilion stand number 7B41 in hall 7 and the UK Pavilion at 4YFN.

A handwritten signature in black ink, appearing to read 'Mike Freer'.

Minister for Exports
Mike Freer MP.

About the Department for International Trade (DIT)

We secure UK and global prosperity by promoting and financing international trade and investment, and championing free trade.

The range of expert services is tailored to the needs of individual businesses to maximise their international success. Companies are given advice and practical support, and staff can assist at all stages of the business planning cycle, from inception to completion.

The UK's commitment to support global investment is unparalleled. Our international network provides a global reach in 170 countries. Staff work to ensure global businesses can invest successfully in the UK.

We are an international economic department, responsible for delivering 4 priority outcomes:

1. Secure world-class free trade agreements and reduce market access barriers, ensuring that consumers and businesses can benefit from both.
2. Encourage economic growth and a green industrial revolution across all parts of the UK through attracting and retaining inward investment.
3. Support UK business to take full advantage of trade opportunities, including those arising from delivering free trade agreements, facilitating UK exports.
4. Champion the rules-based international trading system and operate the UK's new trading system, including protecting UK businesses from unfair trade practices.

UK Export
Finance

UK Export Finance: Leading with finance

With an open and friendly business environment, the UK is a trusted business partner for countries around the world.

UK Export Finance's financing can help buyers in both the public and commercial sectors ensure capital goods or services from the UK come with competitive terms, providing overseas project sponsors with attractive long-term financing.

We can help buyers:

- Borrow at competitive interest rates from banks with the benefit of a strong guarantee backed by the UK government.
- Maintain flexibility, with finance that can also be used to buy supplies locally or globally, and from the UK.
- Aid procurement through supplier fair events which look to match demand directly with UK suppliers offering quality and innovation.

We work closely with the Department for International Trade, the Foreign, Commonwealth and Development Office, HM Trade Commissioners and British Ambassadors to engage with overseas governments and multinational companies looking to buy from the UK.

5G Testbeds and Trials Programme

The UK is committed to providing the world-class digital infrastructure it needs to compete and grow in the modern economy.

The 5G Testbeds and Trials Programme was set up as a centre of excellence in 2017 with £200 million committed to establishing 5G test facilities across the UK.

The Programme has part-funded over 30 large-scale adoption projects across multiple sectors, running in 34 counties in 13 regions of the UK, with over 200 project partners.

The Programme has made solid progress unlocking £2.58 billion or £15 for every £1 invested, due to potential earlier adoption of technology in sectors such as healthcare and manufacturing.

UK5G

UK5G is the national innovation network dedicated to the promotion of research, collaboration and the industrial application of 5G in the UK.

Join the two-day physical and online conference showcasing the variety of 5G trials in the UK March 22 & 23 2022.

Green Planet AR Experience

The cutting edge Green Planet 5G app, fronted by Sir David Attenborough is an inspiring example of how new technology can reconnect us with the natural world whilst demonstrating the power of 5G to a new audience.

5G allows an exciting new way for audiences of all ages to learn more about the natural world by offering very high-resolution immersive experience, including scientifically accurate plants and creatures onto their handset.

The project will be demonstrating the app this year at their Green Planet experience in Regent Street.

Visit our digital Exhibition Halls for practical help on your 5G journey

Company Bio:

51Degrees is your one-stop shop for Device Detection, Geolocation, and TAC services. We provide optimization opportunities for businesses to improve their web offerings with comprehensive, fast, and accurate real-time data.

With an atlas of over 280 device properties, you can segment and personalize your websites, apps, and ads for a multitude of possibilities, including mobile screen sizes and user location. This information can then be used to improve user experience with relevant and targeted content. Our competitors include ScientiaMobile's WURFL.

Come chat with us at MWC to find out how we can turn your lost opportunities into happy customers.

Specialisms:

Our real-time data services (including Device Detection, Geolocation, and TAC intelligence) are the fastest, most accurate, and most complete on the market. We pride ourselves on working out in the open, with open-source code and clear data points.

Operating Markets:

Worldwide

🐦 @AccelerComm

Company Bio:

AccelerComm, an exciting IP company that provides Forward Error Correction (FEC) channel coding solutions to accelerate the next generations of wireless communications.

Our technology solves the challenges that would otherwise limit the speed of next generation wireless communication, namely the error correction decoding that is required to overcome the effects of noise, interference and poor signal strength.

AccelerComm has patented encode and decode IP for 5G NR Polar chain, 5G NR LDPC chain and LTE A Pro Turbo channel coding, offering ultra low latency and delivering the 16x latency improvement to support numerology 4 in advanced 5G NR uRLLC applications.

Specialisms:

AccelerComm specialises in optimised channel coding (also known as forward error correction) solutions for 5G NR providing up to 16x improvement in latency and throughput. We achieve this by supplying best in class FPGA, ASIC and software only solutions.

Operating Markets:

Through years of university research AccelerComms unique technology achieves unprecedented performance whilst laying down the technology foundation for future wireless applications and services. Our technology is operational in several markets including; Mobile Handset, MobileBase station, Satellite and defense.

ANGOKA

Company Bio:

ANGOKA is an IoT security company focused on protecting M2M communications for Smart Cities and Mobility. Headquartered in Belfast, with offices in London and The Hague, ANGOKA offers solutions that protect devices' identities. With an increase of inherently insecure networks coming online with the boom of IoT, ANGOKA's solutions safeguard critical machine-to-machine communication integrity and data provenance, creating trusted connections, even in untrustworthy networks.

ANGOKA is the only cybersecurity company to win a place on Zenzic's CAM Scale-Up Programme. ANGOKA is also an alumnus of the UK Government's National Cyber Security Centre's Cyber Accelerator

Specialisms:

Angoka uses symmetric keys with quantum certified functions such as Hashes. Our system provides lower OPEX because our system allows dynamic, just-in-time generation/update to the device IDs and device private network or session IDs and keys.

Operating Markets:

United Kingdom, The Netherlands

🌐 www.linkedin.com/company/attocore

Company Bio:

AttoCore develops 3GPP standards compliant virtual core network software for 5G and 4G mobile communications that runs flexibly: in the Kubernetes cloud, on bare metal and embedded; on x86, ARM and MIPS processors.

Just add standard small cells to form complete private 5G and 4G networks.

AttoCore's patented mesh technology can link these networks and enable them to expand automatically, with self-healing. Coupling applications such as Push-To-Talk creates Network In a Box solutions for deployment in public safety, military and enterprise private networks.

Attocore's 5G Location Based Service software is best of breed, combining many location methods for superior accuracy.

Specialisms:

AttoCore develops Mobile Core Software for 5G and 4G private networks by applying development and testing practises that ensure the highest standard of Software Reliability and Product Flexibility.

Operating Markets:

AttoCore operates globally through System Integrator partners and has a specific focus on UK, EU and USA

A culture of Innovation

The UK is at the forefront of a revolution. The UK's culture of innovation translates into world leading capabilities across a multitude of technology sub-sectors, from AI and IoT to Communications, Electronics and FinTech.

UK deep tech investment rose by 17% in 2020, the highest rate of growth globally.

It's an industry that's creating thousands of new and highly skilled roles, and simultaneously transforming the workplaces, capabilities and practices of more traditional sectors.

This culture of innovation and entrepreneurial ambition continues to propel the sector to exciting new heights. The UK is experiencing six years of continuous growth (and no signs of stopping) and new tech jobs being created 2.6 times faster than the rest of the economy. Wherever you look, it's evident the UK tech sector is really coming of age.

The UK is third in the world for impact tech investment. Investment has more than doubled since 2018 with an increase of

160%

UK was 5th greatest digital tech services exporter in the world in 2019

£23.3bn

UK digital tech services exports have risen by 25% from 2015-2019

25%

Tech hubs

While the UK technology industry has a global outlook, it's also true many tech companies are thriving due to the strength and advantages of their own local clusters.

These create different kinds of partnership, but ones where idea sharing, concentration of skills and research, and minimal travel time are helping these dynamic 'ground-up' enterprises to thrive and grow.

From seaside towns to major industrial cities, areas of tech excellence have developed all across the UK, often down to local factors such as the presence of an academic institution or historical strengths in particular economy sectors.

Media City in Salford Quays, Manchester, England

London raised more VC investment than Paris, Stockholm, Berlin and Tel Aviv combined in 2020, dominated by fintech.

The UK remains the premier destination in Europe for investment. On a cumulative basis over the past five years, the total amount of capital invested in UK tech companies has nearly reached \$75B.

This is more than double the amount of capital invested in the second and third largest countries; Germany and France.

1 Billion

The UK is the first country in Europe and the third globally to have reached the milestone of 100 tech unicorns, with 29 unicorns being created in 2021 alone. The number of UK tech unicorns now stands at 115, which is more than Germany, France and Sweden combined.

Global Entrepreneur Programme

Global Entrepreneur Programme (GEP) is the UK government's flagship programme that empowers internationally mobile entrepreneurs and enables them to internationalise from a UK global HQ.

Once entrepreneurs have relocated to the UK, we continue to provide support through our Alumni Aftercare Academy to offer upskilling, events, training and facilitating connections into the wider ecosystem.

- The GEP utilises the networks and insight of a team of successful entrepreneurs known as 'dealmakers'
- The dealmakers leverage their expertise and networks to support entrepreneurial talent with the potential for rapid growth.
- Dealmakers are entrepreneurs and business people in their own right, who have extensive experience founding, building and exiting technology companies

<https://eu.eventscloud.com/website/6305>

Over 1 Billion

Equity investment
raised by GEP companies

100,000

High value jobs created

Companies set up their global
HQs in the UK in the last 4 years

The picture of talent and innovation in the UK is a fast evolving one with new pioneers emerging daily. We hope through 'The Beyond 100 Playbook', we will reach out to those who are not just leaders in their field but are willing to find new frontiers to make an impact.

We have UK Innovators who are ready to go global and connect with the ever expanding worldwide opportunity. Healthcare UK, part of the Department for International Trade, has invested significant effort, alongside partners, to identify, engage with and showcase some of the UK's leading talent.

Digital Health is rightly seen as the answer to many of the challenges facing global healthcare. The role of digital technology in realising the dream of accessible, affordable and sustainable care has grown across the entire range of health economies in not only serving current needs, but in building the basis for the healthcare of the future: personalised, digital by default and truly patient centric.

The innovations in the Playbook can offer support to healthcare in a variety of ways from reporting data and using AI, pre-assessment, diagnostics and systems management to managing staff at scale and collaborating. There are solutions to support people at home with self-care apps and remote monitoring and consultation. And see how future tech may transform healthcare.

"I am delighted that Healthcare UK has developed this playbook for some of the best British innovation in digital health and care. They have been instrumental in some incredibly exciting technology-based initiatives, which have supported us through Covid and also the largest transformation in Europe in both the public and private sector. Many of these firms are working closely with our National Health Service (NHS) making a huge difference to treatment, prevention and care across our whole population. They represent immense promise and potential and many are already collaborating on a global scale."

Noel Gordon,
Former Chair,
Healthcare UK Advisory Board

Directory of UK Safety Tech Providers

A directory of more than 90 UK-based companies which provide technology or solutions which facilitate safer online experiences, and protect users from harmful content, contact or conduct.

The companies listed in this Directory offer innovative products and services that help companies deliver safer online experiences for their users. These can help:

- Identify and remove known illegal content, for example which features child sexual exploitation or terrorist activity
- Detect potentially harmful content or behaviour and flag to human moderators for action
- Establish the age of your users and ensure online environments are safe and age-appropriate for children
- Filter content perceived to be harmful across school, business or home internet
- Identify and mitigate disinformation
- More than half (52%) of UK safety tech companies have an identifiable international presence. (The UK Safety Tech Sector: 2021 Analysis (May 2021))
- UK providers of online safety tech hold an estimated 25 per cent of the global market share. (The UK Safety Tech Sector: 2021 Analysis (May 2021))
- The UK is likely to see its first safety tech unicorn emerge in the coming years, with three other companies also demonstrating the potential to hit unicorn status in the early 2020s. (Safer technology, safer users: The UK as a world leader in Safety Tech' (May 2020))

UK Success Stories

51Degrees Qverse

"During the selection process of the device detection providers, we were considering a set of requirements like costs, accuracy, and performance. 51Degrees was the undisputed winner."

Ion Sapoval
SVP Technology and
Engineering at Qverse.

 www.51degrees.com

 marketing@51degrees.com

Stand number:
7A15.8

Qverse, a mobile advertising company, offers holistic performance marketing solutions to help grow mobile brands and apps. They process millions of clicks per day and each of these clicks needs to be analyzed to provide highly targeted mobile campaigns. To do this, information on the user's device (including details on the mobile device hardware, browser, and operating system) needs to be uncovered from the accompanying User Agent.

Qverse needed a solution that would automatically collect the data into an easy to analyze format. The most efficient way to gather this information is with Device Detection. The solution needed high levels of accuracy and great levels of performance for an on-premise deployment.

UK Success Stories

Bohemia Automation

Bohemia Automation

Energy Power Storage Management for EVLO Energy by Hydro Quebec

EVA ICS is a platform for Industrial IoT setups, which allows creating secure private clouds, exchanging data between nodes in real-time, quickly creating interfaces, and applying cloud logic on events and brings the IaC paradigm into the IIoT world for DevOps.

Serhiy Symonenko
MScs CTO Bohemia Automation

 www.bautomation.co.uk

 ho@bautomation.co.uk

Bohemia Automation created a solution for EVLO Energy and Hydro-Quebec using EVA ICS to manage and monitor the distributed grid of high-capacity energy batteries for various types of power plants.

The platform allows the customers to build highly-secure, isolated private clouds and quickly extend them on demand, which is very important for high-energy sector solutions.

Working in high-energy distribution and storage, EVA ICS has proved its amazing reliability and security for mission-critical tasks.

Customers' engineering teams emphasize that EVA ICS is very flexible, easy-to-use, and obviously one of the best solutions available on the Cloud-SCADA market.

CEH Technologies Ltd

Mymanu helps break down languages with guests at Marriott Hotels

We undertook a pilot at the Madrid Marriott Auditorium Hotel and Conference centre where staff were equipped with Mymanu Klik S and guests could use dedicated touch screen equipment powered by our in-house translation app. Everyone could speak and listen to the translation in their native language .

 www.mymanu.com

 hello@mymanu.com

Stand number:
7A15.1

- Mymanu was selected from more than 150 entrants to help Marriott guests feel at home with its communication technology
- Marriott hotels challenged Mymanu to help it improve communication with guests from other countries and overcome language barriers
- More than 700 users interacted with Mymanu technology
- 90% reported that Mymanu technology had improved their experience at Marriott
- 75% of surveyed guests felt comfortable using the translation system, improving their communication with associates of different nationalities.
- 100% of surveyed event organisers expected a significant increase in networking opportunities

UK Success Stories

Emeldi UK

The commercial and IT transformation of O2 Czech republic

Jan Hruska CTO of O2 Czech Republic - "It's the heart of our CRM," says Hruska. "Emeldi is a key partner that we picked because of their flexibility. We are able to influence the product and get any solution we need."

Objective:

Simple Online Company:
Transformation from CRM centric solution formerly based on Siebel CRM

Purely digital commerce Omni-channel solution based on digital commerce centric architecture

All-channel support and fully integrated CRM in one application

 www.emeldi.com
 mark.bystriansky@emeldi.com

Stand number:
7A15.7

Goals:

Enable easier and quicker introduction of new products and services

Create a digital commerce platform which enables rich sales continuity of the CX across all channels

Achieve large TCO reductions by rationalising and simplifying the systems architecture, business processes and customer interactions

Introducing all-channel support in one application, enabling retirement of the Siebel CRM legacy

Provide full support for MVNOs hosted on O2's infrastructure

Results:

Transformation of IT into an "enabler" and supportive force for business through increased flexibility and service offerings

Reduction in "Time-to-market"

Significant cost reduction through application consolidation and decommissioning

Empello Ltd

Empello reduces advertising fraud significantly at Orange Cote d'Ivoire

"Orange Côte d'Ivoire is proud to have Empello as a key anti-fraud partner. They have helped us keep the market ecosystem fair between all VAS partners and provide us with insightful details on a monthly basis."

Elimane Sow-Ouakara,
Vas Senior Manager
Orange Côte D'Ivoire

 www.empello.com
 info@empello.com

Stand number:
7G79MR

Empello has been working with Orange Côte d'Ivoire since the beginning of the Covid-19 pandemic lockdowns in March 2020, when we saw significant increases in ad-fraud occurring both globally and locally in Cote d'Ivoire.

Through our combination of effective identification of ad fraud, and efficient take down and management of the compliance process, Empello has reduced high risk and medium risk advertising issues by nearly 100% when comparing the start of the compliance monitoring program in March 2020 to today.

Typical ad fraud issues found by our team of highly experienced multi lingual compliance analysts include Brand Passing Off, non compliant flows, adult advertising, content locking and misleading incentives.

JAYBEAM WIRELESS SAS

Integra – the world's first upgradeable base station antenna

"MNOs are the fastest adopting industry of the United Nation's Race to Zero campaign to cut their carbon footprint. We're delighted to provide this solution and look forward to working with customers to evolving their networks in a lower-carbon way."

Mette Brink
CEO at Amphenol Antenna Solutions

 www.amphenol-antennas.com
 info-emea@amphenol-antennas.com

Stand number:
7B51

Amphenol Antenna Solutions developed a new upgradeable antenna solution that reduce the carbon footprint of base station antennas by 50%. The solution, called Integra, addresses mobile network operators' need to keep their base station technology up to date and reduce their carbon footprint. Across the mobile industry, the advance of technology means that thousands of perfectly functioning antennas are scrapped every year. But under the Integra concept, used antennas will be returned to Amphenol Antenna Systems for refurbishing and upgrade. MNOs can then order the upgraded antennas for installation at their sites.

During the upgrade process, antenna modules that are obsolete will be replaced by up-to-date parts, while modules with current technology will be refurbished. The whole antenna will be tested, certified and warrantied to the same high standard as any other antenna from Amphenol Antenna Solutions.

KORE

Logistics Case Study: Drones Deliver Critical Medical Assets

"The ability to communicate reliably anywhere in the world, anytime, allows Swoop Aero to deploy a sustainable and scalable drone logistics network bridging the last-mile and enabling an equitable health access to anyone from Scotland to Malawi."

Eric Peck,
CEO

 www.eu.korewireless.com
 kthomas@korewireless.com

Stand number:
2C20MR, 2C22MR

Challenge

- To transform the way the world moves essential supplies via air and bridge the logistics gap overcoming vast distances, traffic congestion, location accessibility, inhospitable terrain, & data shortages.

KORE Solution

- Multi-carrier and multi-technology connectivity under one contract, and one billing and support system.
- Global resilient connectivity offerings that seamlessly integrate with drone logistics, launching everywhere from ground to sea.
- KORE's CMP to manage every network connection across multiple carriers and satellite providers and,
- KORE eSIM Device Validation Tool, to test a device's eSIM interoperability before it's deployed to the field.

Outcome

With the KORE eSIM, they can effectively scale anywhere across the globe knowing that their drones can be remotely provisioned at the production facility and delivered with out-of-the-box connectivity.

UK Success Stories

Masters of Pie Hyperbat - Delivering VR Digital Twins over 5G

The Hyperbat 5G solution lays the foundation for the factories of the future. It validates the ability of the enabling technology to deliver XR solutions covering larger distances. It drastically simplifies the network infrastructure paving the way to faster, modular, and cost-effective adoption of innovation on a factory-wide basis.

 www.mastersofpie.com
 enquiries@mastersofpie.com

Stand number:
7A15.4

The Hyperbat solution is a groundbreaking digital transformation initiative delivered by a consortium of companies including BT, Ericsson, Masters of Pie, Nvidia, and Qualcomm, that explored how the use of VR and the digital twin of the model, leveraged by enabling technologies like 5G, edge computing, server-side rendering, cloud streaming, and XR collaboration, materially optimises the handover between dispersed design and manufacturing teams across the UK. The ability of the proof of concept to identify errors and reduce review iteration cycles during the design phase will have a material benefit to the overall profitability of the project. This untethered 5G native VR experience at Hyperbat is a world-first and has allowed teams to walk around and interact with a 3D lifesize model, in real-time, without the constraints of a physical connection.

Mobile Mark Europe Ltd Michelin MEMS Tyre Pressure Monitoring System

The Challenges

- Too many antennas; too long to install
- Older wireless technology was still being used
- Coverage was difficult due to mining environment

The previous tyre monitoring system used multiple antennas to cover 3G, WiFi and GPS. The system needed to be consolidated and updated to cover new frequency bands. Data needs to be reliably transmitted both in-close to vehicle and from all corners of the mining field, and in a harsh, high vibration environment.

 www.mobilemark.com
 enquiries@mobilemarkeurope.co.uk

Stand number:
7B19

The Solutions

- Multi-band package containing all antennas in one housing
- Upgrade from 3G to 4G Cellular, and from GPS-only to GNSS system
- Use vibration minimizing construction for vehicle antennas
- Identify optimum mounting location for widest RF coverage

The new system combined multiple antennas into a single package covering additional frequencies used by the upgraded systems. The interior of the antenna housing was filled with an RF compatible foam to ensure both vibration protection and wireless performance provide the best coverage both near to the vehicle and at a distance.

Mobilise Wi-Fi for MVNOs Freenet Case Study

With their telecom expertise and digital solution, Mobilise were able to help us launch a premium service to our valued customers, as well as manage the underlying technology with little overhead on our side in both the implementation and operation.

Benjamin Grimm,
Head of Networks
& Offers at Freenet

 www.mobiliseglobal.com
 hamish.white@mobiliseglobal.com

Stand number:
7A15.11

Freenet sought to offer an integrated Wi-Fi Service to its Mobile customers in Germany to provide an alternative service and satisfy its customers' ever-growing need for consuming more data and differentiate its offering from the competition. Mobilise, via its M-Connect platform, offered a white-labelled Wi-Fi solution to Freenet and its customers as a value-added service in form of an add-on to existing tariff plans. The service was seamlessly integrated into the digital channels of Freenet with great attention to the user journey. Mobilise delivered a mobile app through which Freenet's users were able to connect to any of the 65 million global Wi-Fi networks supported. The Wi-Fi service is offered as a standalone 1- or 12- month subscription or given for free as a bundle within higher ARPU plans. The bundle option acts as an incentive to drive customers up the ARPU ladder and increase Freenet's revenue per user.

Ranplan Wireless Optimising wireless network design for large theme park

"Ranplan's ability to accurately simulate the network as a whole rather than cell by cell helped us to optimise the overall performance, reduce boomers and over-shooters effect and modify antenna configs to achieve better user throughputs in such a heavily loaded high profile venue."

Amr Albanna,
CEO, Omega Wireless

 www.ranplanwireless.com
 info@ranplanwireless.com

Stand number:
7B15

Ranplan's customer Omega Wireless were tasked with optimising the wireless coverage experienced by millions of users at a large theme park in California, USA. To tackle this complex project, Omega Wireless, chose Ranplan Professional to evaluate and optimise the theme park's wireless network for two of the top 3 tier US Operators. They used Ranplan Professional to created 3 RF heatmap simulations to predict and compare the coverage, quality and throughput results of changing the antennas' tilts, azimuths, power and in some cases replacing the antenna entirely. The throughput performance improved by up to 240%, with an average of 50% despite there being higher traffic loading increased pressure on the network. The average user throughput of the overall cluster saw an improvement of 25%-30%. This is equivalent to adding 1-2 carriers to the venue which could have cost the Operators millions of dollars to achieve.

Truphone

Extreme launches EXTREME CONNECT - powered by Truphone's eSIM technology

Current mobile network offers leave much to be desired by our community in terms of experience. No more roaming charges, no waiting for SIM cards, and clear price plans mean that EXTREME Connect is now the most user-friendly mobile solution available, thanks to Truphone.

Alistair Gosling
CEO, Extreme

 www.truphone.com
 truphone.mwc@truphone.com

Stand number:
5A32

EXTREME Connect will be powered via an app by Truphone's state-of-the-art platform for enabling companies to bundle its connectivity and eSIM technology with their existing products. A company that prides itself on its nomad approach to travel, EXTREME needed a partner that would afford its users the freedom to stay connected anywhere in the world, at a moment's notice at affordable prices. Truphone allows EXTREME's users to focus on their own adventures—safe in the knowledge that connectivity is covered.

With Truphone, each EXTREME Connect subscriber will now have access to data in more than 110 countries. With over 100 direct global roaming agreements provided through the Truphone network, EXTREME Connect offers its users high streaming speeds and reduced latency.

UM Autonomous Systems

Emergency Drone Fleet Search and Rescue - City of Vienna

“Smart city solutions make urban living spaces fit for a networked, digital future, as the example of the life-saving drone solution from Unmanned Life shows. The technologies required for this, such as 5G, create the basis for innovative approaches to life in public spaces.

Werner Kraus
CCO Business, Magenta.

 unmanned.life
 jorge@unmanned.life

Stand number:
GSMA Foundry Stand -
Booth 302 - Industry City - Hall 4

Although Austria has one of the best air rescue systems with 23,000 operations annually, the costs of deploying a manned helicopter can easily reach several thousand euros.

To solve this key pain point, Unmanned Life collaborated with Magenta Telekom, Stadt Wien and Austrocontrol to deploy its autonomous search and rescue product which consisted of a fleet of three autonomous drones equipped with multiple sensors and payloads.

Within the deployment, two autonomous drones capable of streaming HD video in real-time provided the Vienna Fire Department with critical on-the-ground insights by scanning the Danube. Potential individuals in distress were identified by our AI algorithms running in the backend and this information was relayed to the fire department through our management interface. Once confirmed by the end user, the third drone autonomously took off and delivered a life jacket to the location of the identified individual.

UK Success Stories

White Label Loyalty Burger King EMEA Case Study

"We approached WLL to deliver a loyalty solution that was flexible enough to work across franchises with multiple point-of-sale systems and in several languages. They successfully delivered a solution that was up and running within our existing app within a few months."

Katrin Anthes
Digital Business Direct
Markets Manager

 www.whitelabel-loyalty.com
 info@whitelabel-loyalty.com

Stand number:
6C31.In

Burger King Europe was looking for a new loyalty solution, aiming to retain more of its existing customers and increase repeat visit. However, they also wanted greater insight into the behaviour of its consumer base.

We overcame challenges of fragmented POS systems and franchisee system by using our receipt scanning solution to capture data and deployed a microsite, integrated into an existing BK app for users' convenience. The pilot quickly became a success, driving repeat visits & successfully spotting fraudulent activity. We are now enhancing the system to directly integrate with self service kiosks and roll out the solution to wider markets.

Connected Places Catapult is the UK's innovation accelerator for cities, transport, and place leadership. We provide impartial 'innovation as a service' for public bodies, businesses, and infrastructure providers to catalyse step-change improvements in the way people live, work and travel. We connect businesses and public sector leaders to cutting-edge research to spark innovation and grow new markets. We run technology demonstrators and SME accelerators to scale new solutions that drive growth, spread prosperity, and eliminate carbon.

 info-MK@cp.catapult.org.uk

 cp.catapult.org.uk

We have a rich mix of expertise which means we can translate innovation between sectors. Our skilled teams speak the language of engineers, marketers, designers and investors. Which means we excel as ecosystem conveners between the public and private sector. Leveraging a network of 4,500+ SMEs and 50 Universities.

- Climate action: Reduce emissions and build resilience
- People's experience: Design for the customer and address changing needs
- Connected intelligence: Connect data and infrastructure

Exhibitor Profiles Extended

swidch

swIDch

swIDch eliminates digital identity-related fraud through OTAC™ (One-Time Authentication Code): a unique, unidirectional and dynamic token that identifies and authenticates users/devices without a network. Because it's a single-use, time-based code, there's no risk of hacking or hijacking.

 www.swidch.com
 nakyung@swidch.com

Stand number:
7F21

swIDch is a cybersecurity startup based in London that is committed to bringing secure authentication to every digital identity even in the off-the-network environment.

Since its establishment in 2018, swIDch has been recognised for its world's first one-way dynamic authentication algorithm 'OTAC (One-Time Authentication Code)' by taking first place in the 'Potential Unicorns' by the Korean Ministry of SMEs/Startups and winning global awards such as Europas 2020 and Cybersecurity Breakthrough Awards two years in a row ('Authentication Solution of the Year' in 2020 & 'Overall Fraud Prevention Solution Provider of the Year' in 2021.)

Great Creativity is game changing

The UK has created some of the world's most iconic games, including Red Dead Redemption 2, Tomb Raider and Grand Theft Auto. With a growing talent pool of world-leading developers, collaborating with us offers you huge growth opportunities.

To see things differently, choose the UK.

Proud, of the North of England

There are many reasons why we are proud to be from the North. It is a region steeped in history, industrial heritage, invention and ground-breaking discovery. It is also home to some of the most dynamic regions of the UK and is vitally important both to the UK economy and as a global trading partner.

Our businesses produce many innovative, high quality, distinctive products and services across a diverse range of industries underpinned by a dynamic business ecosystem that includes some of the world's highest ranking universities, internationally significant centres of Research & Development excellence and high-calibre business support organisations.

Add to that some of the UK's largest Atlantic (Panama, USA, China, Singapore) and European (Ireland, Netherlands, Scandinavia, Baltics,

France, Belgium, Germany) connected shipping ports and seven international Airports, including Manchester, which flies to more overseas destinations than any other UK airport. You can see why the region is providing commercial success for lots of UK and foreign owned companies. There is a high international demand for what the region produces.

Turning to MWC, the Northern Powerhouse is also one of the fastest growing areas in Europe for technology with outstanding capabilities in High Performance Computing, Artificial Intelligence, Simulation, Internet of Things, Gaming, and Immersive Technology. It also has a wealth of expertise in materials engineering and manufacturing research and design. These capabilities combine impressively with entrepreneurial know-how to meet consumer demand.

Northern Powerhouse Delegation

Addressless Mailing Ltd

We acknowledge the trend that Millennials do not store or know address details. Addressless Mailing™ replaces the need to know an address with the need to just know the recipient's mobile phone number.

 www.dustid.com
 michael.livingstone@dustid.com

Stand number:
7B41

DustiD is a SaaS workflow tool that once downloaded and embedded within a retail partner's checkout, reduces friction by allowing registered DustiD members to address purchases with nothing more than the recipient's mobile phone number.

In a single click we share the recipient's verified and preferred shipping address with our retail partners. Retailers download a GDPR compliant script via an API and our software ensures complete privacy.

We're focused on online retailers where the majority of their sales are gift centric. Allowing SME retailers and global brands like Etsy, Moonpig etc to improve the customer experience.

CGA Simulation

We have created a 5G small cell network for the Liverpool 5G project (L5G). L5G is one of the largest small cell installations in Europe. A private public sector network which provides 5G, WiFi and backhaul via mmWave.

We empower the global telecoms world by developing the specialist knowledge, skills and competencies organisations need to build, maintain, optimise and operate the cutting-edge communications networks of today and tomorrow.

Trusted by the telecoms industry since 1958, we've helped upskill over 300,000 professionals from mobile and fixed operators, vendors, regulators, consultants, rail operators, energy suppliers and government organisations worldwide.

We support learners at all stages of their career from new entrants to experienced engineers by delivering training across a range of formats that build knowledge in an engaging and enjoyable way to inspire, reinforces knowledge and promote life-long learning.

UK Tradeshaw Programme

Businesses exporting, or thinking of exporting from the UK can attend UK Tradeshaw Programme's selection of supported overseas tradeshaws and conferences, and potentially receive grants to offset some costs.

Overview

Attending overseas tradeshaws can help you:

- Gain essential market knowledge and make new contacts.
- Gain experience in attending and getting the most from overseas tradeshaws.
- Get advice and support from trade experts on how to maximise your presence.

The UK Tradeshaw Programme provides all successful applicants with training, both about tradeshaws in general and also specifically about the event that they applied for. The highest ranked applicants may also receive financial support to help with exhibiting at the show, such as the costs of stand space.

To view a list of UK Tradeshaw Programme supported events, please visit <https://www.events.great.gov.uk/website/5935/>

UK Government

The UK's Department for International Trade (DIT) helps businesses export, drives inward and outward investment, negotiates market access and trade deals, and champions free trade.
