XS Infosol approaches project management with a long-term perspective and we work in partnership with our clients. Our approach to product development has always been an end-to-end service offering, right from design to coding to implementing the final user interface.

Our involvement goes far beyond the actual delivery of software solutions and extends to ongoing technical support. In addition, we also extend technical support to our client's customers in India who end-use the software solutions developed by XS Infosol. This multi-tier involvement by XS Infosol benefits our clients enormously in the long run in building their own customer relationships. This customer orientated approach at XS Infosol ensures that we partner our clients in their continued success.

Our Work Style: XS Infosol is a company that is at ease in a fast paced technology driven business world. We focus on deploying technology in ways that can transform your business initiatives into successful business strategies with long-term implications. We take your business initiatives and turn them into reality with our advanced skills, innovative approach and highly developed conceptualizing abilities. In fact, our team is at their enthusiastic best when faced with fresh new business challenges. The more challenging, the better!

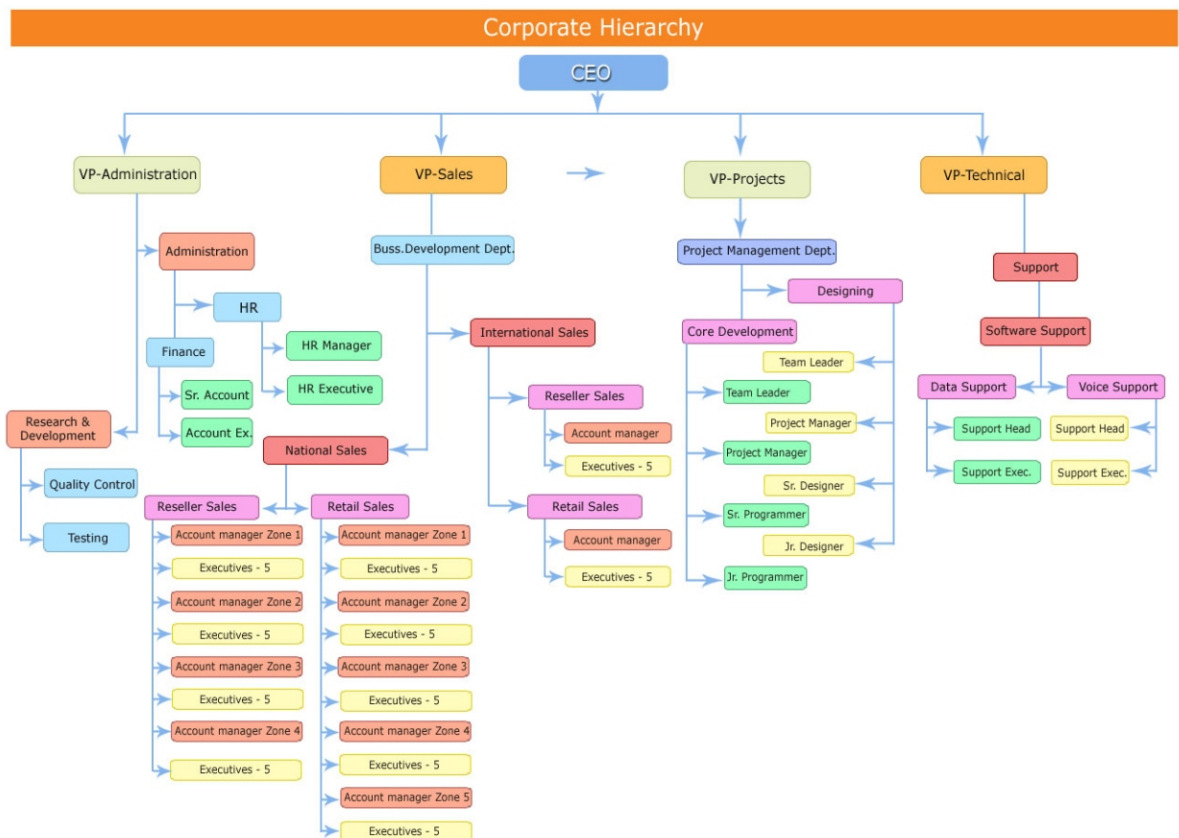

Management People

People Power

People Power: Our staffing strength is constantly being augmented to meet the needs of our growing list of clients both in India and around the world. Our employees have a high level of expertise and rich multi-site experience garnered in reputed companies. They skillfully support our off-shore project management operations and onsite implementation efforts.

Smart HRMS - HRMS Solution for every corporate.: Smart HR Module is very simple, flexible and user-friendly HR Management software that takes care of all your requirements relating to accounting and management of employees' Payroll. Smart HR Module complete records of the employees, generates Pay-slips and Attendance Register, Computes all allowances and deductions and generates all Statutory and MIS reports.

Smart Payroll is salary processing software with good and wide-industry range of client base in INDIA. It offers very high flexibility in defining various allowances, deductions, leave rules etc. for the employees and all formula for P.F, PF TRUST., F.P.F., E.S.I.C., Profession Tax, Income Tax etc. are definable and changeable at User's end.

Smart Dialer: The Smart dialer uses a variety of algorithms to predict both the availability of agents and called party answers, adjusting the calling process to the number of agents it anticipates (or predicts) will be available when the calls it places are expected to be answered. While, auto dialer merely automatically dials telephone numbers for call center agents who are idle or waiting for a call,

Custom Business Applications: We, at XS Infosol can create, deploy and maintain customized applications which can be capitalized to improve your business solutions. We develop feature rich applications considering the industry standards and industry evolution which fit to the needs of the customers. The software and systems developed by us would strengthen your business to stand in the changing market and serve as per the wants. Our custom application development solutions enable you to enjoy competitive advantages of the technologies and serve the industry best services. We offer application development, maintenance and support to all our large-scale clients which incorporate all the latest practices of the market. We broaden your business process through creation and implementation of high quality Custom Business Applications.

Search Engine Optimization: It is a myth that if your product is superior you don't need marketing and advertisement. Truth is that even the best products cannot win in the market if it is not been marketed properly. And when we are living in the Internet era, web marketing plays a vital role in the growth of business. Even if you have a groundbreaking web site and you are providing quality service, there is no meaning of it, till your web site doesn't achieve good ranking in major search engines. And here comes the role of Search Engine Optimization. SEO is a practice to give your site better visibility in all the major search engines like Google, Yahoo and MSN and increase targeted traffic.

Business Process Management: BPM, business process management focuses on aligning organization with the demands of clients. The main activities which can be covered in the business process management are design, modeling, execution, monitoring and optimization. BPM unites Process Modeling, Simulation, Workflow, Enterprise Application Integration and Business Integration into a single organizational platform. It is a management discipline that deals with the change to improve business processes that is cross functional in nature and makes maximum use of technology to mold processes, analyze the model, mechanize the processes and measure and optimize process performance.

BPM, business process management focuses on aligning organization with the demands of clients. The main activities which can be covered in the business process management are design, modeling, execution, monitoring and optimization. BPM unites Process Modeling, Simulation, Workflow, Enterprise Application Integration and Business Integration into a single organizational platform. It is a management discipline that deals with the change to improve business processes that is cross functional in nature and makes maximum use of technology to mold processes, analyze the model, mechanize the processes and measure and optimize process performance.

Manager-Operations -AIRCEL: Excellent product, The installation procedure was very professional and operated flawlessly. The product is simple and easy to use.

CEO, WPISL: From the first reply to my initial inquiry email to XS Infosol through to their presentation and fine tuning of the project proposal I can safely say that the degree of customer support and customer care displayed by XS Infosol exceeded my wildest expectations and truly created an environment of comfort and a "team" atmosphere. Through and through it was an absolute pleasure working with XS Infosol staff and their sheer professionalism warrants my full recommendation.
