

## SoftAtHome sells software products

## to make the home smarter

# **A** VISION

Today, the home is at the center of our Digital life with the number of connected devices growing exponentially from 10 per household to 50 in 2020. In this context, connectivity at home should be like the air we breathe available everywhere so that users just use and enjoy their services.

At SoftAtHome, operators are playing a central role in providing the next generation of Digital Home experiences with seamless connectivity, providing a new level of customer experience that hides underlying complexity and is designed with in-built security and privacy.

A COMPANY

250 people

SoftAtHome products power digital home services. running directly on the device (Home Gateways, Set-Top Boxes, OTT boxes, NAS, Wi-Fi extenders and repeaters, IoT Hubs, In-Home Energy displays, Smart speakers, etc.) or in the cloud.

Based on open standards, SoftAtHome products leverage an open ecosystem and enable a wide range of services for operators (TelCos, Broadcasters, Energy suppliers, Insurance Companies, etc.) so as to delight their customers with the best of technologies available for the digital home.
